Hello Dr. Lang,

The emails you received are NOT from Frontiers. They are an ongoing phishing attempt that our IT team is aware of but unable to prevent, as it is not coming from our servers. You'll notice that the email address domain is [gmail.com](mailto:gmail.com), whereas all of our official emails will have the email domain [frontiersin.org](mailto:frontiersin.org). Please do not click on any of the links in these emails and immediately block the sender.

We apologize for the confusion and anxiety that this may have caused. Thank you for your understanding and please note that all invoices allow for a 30-day processing and should always be handled through the payment system attached to the invoice.

Kind regards,  
Audrey
